Prof.Purushottam Kulkarni Assistant Professor, Department of Computer Science and Engineering, IIT Bombay

The in-house robotsdesigned and developed at ERTS Lab are great teaching and resarch Platform.

The novel lab in-a-box and supporting Course material, at affordable will be a major a boost for embedded systems knowledge dissemination. The robots and other embedded hardware developed at the laboratory have supported implementations of several research prototypes. I envision these platforms to maturing and playing a major role in research projects.
